

FILIP ILIEVSKI

Computational Lexicology & Terminology Lab/Knowledge Representation & Reasoning
Vrije Universiteit Amsterdam
The Netherlands

Phone: +31 63 6489042

email: flip@ilievski.nl

HOME PAGE: <http://ilievski.nl>

Education

03/2015-02/2019 PhD in Natural Language Processing, Vrije Universiteit Amsterdam

- Computational Lexicology and Terminology Lab (CLTL) / Knowledge Representation & Reasoning (KRR)
- Project: Understanding Language By Machines (<http://www.understandinglanguagebymachines.org/>)
- My research focused on multiple aspects of the underaddressed challenge of interpreting long-tail identities in text, namely: description, analysis, evaluation, access to knowledge, and solution systems.
- Supervisors: Prof. Dr. Piek Vossen, Dr. Marieke van Erp (CLTL, VU), Prof. Dr. Frank van Harmelen, Dr. Stefan Schlobach (KRR, VU)

09/2013-02/2015 MSc in Artificial Intelligence, Vrije Universiteit Amsterdam

- Specialization: Intelligent Systems Design
- VU Fellowship Program (VUFP) Recipient
- GPA: 8.4/10.00, Graduated Cum Laude
- Thesis title: “NED with two-stage coherence optimization – How i am teaching my Ford automobile not to run on 20th century presidential elections in US”
- Thesis supervisors/advisors: Dr. Marieke van Erp, Dr. Stefan Schlobach, Prof. Dr. Piek Vossen, Dr. Wouter Beek

09/2009-09/2013 BSc in Computer Science and Engineering, Ss. Cyril and Methodius University, Skopje

- Study Abroad - Vrije Universiteit Amsterdam, The Netherlands (Fall 2012 - Spring 2013, funded by the Erasmus Mundus Euroweb Scholarship Recipient)
- GPA: 9.56/10.00

Work Experience

- 03/2019-present Postdoctoral Researcher, Vrije Universiteit Amsterdam
- Projects: Dutch FrameNet and Nationale Nederlanden; plus teaching and supervision
 - Employer: Prof. Dr. Piek Vossen
- 02/2017-08/2017 Research Visit, Language Technologies Institute, Carnegie Mellon University
- Project: The Profiling Machine - Active Generalization over Knowledge
 - During this visit, I investigated how to build profiling machines that can provide human-like world expectations, implicit in communication and in knowledge bases. For this purpose, two neural architectures were designed (an autoencoder and an embeddings-based model) , implemented in Theano, and validated against human judgments. The resulting paper is currently under anonymous review at AAAI'19.
 - Supervisor: Prof. Dr. Eduard Hovy
- 11/2014-02/2015 Research Assistant, Vrije Universiteit Amsterdam
- Project: [NewsReader](#)
 - During this period, I developed a contextually adapted Entity Linking module in Python. I also created a streaming architecture for inferring event instances and representing them in RDF format, in the Java programming language.
 - Supervisors: Prof. Dr. Piek Vossen, Dr. Marieke van Erp
- 02/2013-10/2014 Junior Software Developer, i-mapping, Amsterdam
- Project: Studio for Geographical visualization of statistical data
 - We developed a full-stack engine for flexible visualization of statistical data on political maps. For comparison of performance, the same functionality was implemented in multiple languages (Python and Node.js), and the data was stored in multiple databases (flat files, MySQL, Redis, Couchbase).
 - Supervisor: Marijn Deurloo
- 07/2011-08/2011 Intern, ATTE, Bitola, Macedonia
- We created a medical information system in PHP, Wordpress, and MySQL.
 - Supervisor: Dr. Aleksandar Stefanovski

Awards and Scholarships

09/2016

Second place at the European Linked Open Data Project contest, Semantics conference

- Awarded to our tool *LOTUS: A Search Engine for the Web of Data*

09/2013-02/2015

VU Fellowship Programme (VUFP) Scholarship for Academic Excellence

- VUFP funds (tuition fees + 3k euros/year) the Master's degree studies at Vrije Universiteit Amsterdam for a selection of talented prospective international students.
- Sponsor: Vrije Universiteit Amsterdam, The Netherlands
- Years: 2013-2014 and 2014-2015

09/2012-06/2013

Erasmus Mundus Euroweb Scholarship for Student Mobility

- Erasmus Mundus Euroweb is a scholarship programme for Western Balkans students on undergraduate, master, doctoral, and post-doctoral level who want to study/work in EU countries, and vice versa.
- Sponsor: European Union
- Year: 2012-2013

09/2010-06/2012

Best 125 IT students in Macedonia Scholarship

- This scholarship is awarded to the top 125 IT students in the country with an average GPA of 9.0 or higher.
- Sponsor: Ministry of Education and Science of Macedonia
- Years: 2010-2011 and 2011-2012

Technical skills

- Daily experience with Python's scientific stack: Theano, Scikit-learn, Matplotlib/Seaborn, Notebooks, Networkx, Pandas, ...
- Some experience with many other languages: Node.js, HTML/Javascript/CSS, C#, Matlab, Java, R, C, C++
- Databases: (My/MS)SQL, Neo4j, ElasticSearch, Redis, Couchbase, MongoDB
- Experience with Semantic web: RDF, SPARQL, LDF, ontologies
- Formats: RDF, XML, JSON, CSV/TSV
- Knowledge of algorithms, machine learning, and neural networks
- Statistics and linear algebra
- Crowdsourcing with Figure Eight
- Linux, Mac OS X
- UML

Software

- <https://github.com/cltl/Profiling> Code from the paper 'The Profiling Machine: Active Generalization over Knowledge', where we build two neural architectures for generating expectations for implicit/missing values of people profiles.
- <https://github.com/cltl/AnnotatingEntityProfiles> All code from the annotation tool that was used to mark evidence for entity properties in text, but also complement the structured data with new knowledge found in text.
- <https://github.com/cltl/LongTailAnnotation> The entire code from the first version of this tool, used to annotate mentions of events in text based on structured knowledge.
- <https://github.com/cltl/EL-long-tail-phenomena> Analysis of various long-tail properties of entity linking datasets in relation to system performance.
- https://github.com/filipdbrsk/LOTUS_Indexer All code that was used to create the LOTUS index, the largest public text search index to the LOD cloud.
- https://github.com/filipdbrsk/LOTUS_Search All code that powers the search API and website of LOTUS (the largest public text search index to the LOD cloud), once the index is already created.
- <https://github.com/D2KLab/relink> Entity Linking system based on several human-inspired heuristics for domain adaptation, written in Python.

- <https://github.com/cltl/HumanLikeEL> Entity linking system inspired by human classification of knowledge types for framing.
- <https://github.com/cltl/News2RDF> A pipeline for conversion of news documents to RDF knowledge.
- https://github.com/cltl/SemEval2018-5_Postprocessing Postprocessing scripts for SemEval-2018 task 5.
- <https://github.com/cltl/GunViolenceCorpus> The Gun Violence Corpus, mostly annotated during the organization of the SemEval-2018 task 5.
- <https://github.com/cltl/LongTailQATask> The entire code for the SemEval-2018 task 5.
- <https://github.com/cltl/SemanticOverfitting> The code used to analyze datasets from five disambiguation and reference tasks using a set of statistics.
- <https://github.com/globalwordnet/ili> RDF backend of the Wordnet InterLingual Index.
- <https://github.com/dbpedia-spotlight/evaluation-datasets> Analysis of evaluation datasets for Entity Linking.
- <https://github.com/filipdborsk/LODLanguages> Analysis of the state of the language literals in the LOD cloud.
- <https://github.com/filipdborsk/EventCoreference> Implementation of the event coreference module used in the NewsReader project pipeline.
- <https://github.com/filipdborsk/ned-twophaseoptimization> Master thesis code of the entity linking modules.
- <https://github.com/cltl/python-for-text-analysis> Material of the course 'Python for text analysis'.

Organizing Committee

COMPETITION

Marten Postma, Filip Ilievski, Piek Vossen (2016). [SemEval-2018 Task: Counting Events and Participants within Highly Ambiguous Data covering a very long tail](#), SemEval-2018 workshop, co-located with NAACL 2018

WORKSHOP

Filip Ilievski, Marten Postma, Piek Vossen (2016). [2nd Spinoza workshop: Looking at the Long Tail](#), Vrije Universiteit Amsterdam

TUTORIAL

Wouter Beek, Javier Fernandez, Paul Groth, Filip Ilievski (2016). [Join the LOD Lab! Scale your Linked Data evaluations to the Web](#), Extended Semantic Web Conference (ESWC) 2016.

Program Committee and Reviewing

NLP Applications: completing the puzzle workshop 2015, co-located with NLDB2015

European Summer School in Logic, Language and Information (ESSLLI) 2017 (student session)

Teaching

2018-2019	Knowledge Representation on the Web, Vrije Universiteit Amsterdam, Guest Lecturer
2018-2019	Text Mining, Vrije Universiteit Amsterdam, Lecturer
2017-2018	Python for Text Analysis, Vrije Universiteit Amsterdam, Lecturer
2017-2018	Programming for Humanities and Social Sciences, Vrije Universiteit Amsterdam, Lecturer
2017-2018	Digital and Environmental Humanities, Vrije Universiteit Amsterdam, Lecturer
2017-2018	Databases, Rijksuniversiteit Groningen, Guest Lecturer
2015-2016	Information processing (Informatieverwerking), Vrije Universiteit Amsterdam, Lecturer

Supervision

2019	Jiri Brummer: Framework for comparison of different machine learning methods. MSc thesis, Business Analytics, KPMG and VU Amsterdam. Supervisor
2019	Guido Jansen: Low Resource Domain Specific Named Entity Recognition. MSc thesis, Information studies, Data science, University of Amsterdam. Second reader
2018	Arash Parnia: Mathematical Entity Recognition System MERCS. MSc thesis, Artificial Intelligence, VU Amsterdam. Second reader
2016	Sai Sreewathsa Kovullari: Entity Typing with Page Ranking. MSc thesis, Computer Science, VU Amsterdam. Second reader

Other Experience

- Volunteer at HackYourFuture, teaching refugees to code
- Participation in various civil and student NGOs

Languages (CEFR levels)

- **Macedonian** Native speaker
- **English** C2
- **Serbocroatian** C1
- **Dutch** B1
- **Spanish** A2
- **German** A1
